WORK EXPERIENCE

Game Developer Intern — Metaverse Project

Jan 2026 – Jun 2026

- Diagnosed and resolved critical multiplayer synchronization bugs using **PUN (Photon Unity Networking)**, leveraging RPCs and `OnPhotonSerializeView` to ensure stable real-time gameplay across clients in the Metaverse environment.
- Integrated and retargeted character animations sourced from **Mixamo (Adobe)** into Unity, including blend-tree setup and in-game triggering via the Animator Controller.
- Fixed **Multiplayer Animation Synchronization** issues — avatar animations (movement, idle, actions) are now correctly replicated across the network for all connected players.
- Managed version control using **Git / GitHub** with a structured multi-branch workflow maintaining separate **development, testing, staging, and production** branches, following a standard CI/CD release pipeline.
- Performed **3D asset optimisation in Blender** — removed unnecessary geometry, cleaned up meshes, and repositioned scene objects to reduce draw calls and improve runtime performance.

Intern — Edunet Foundation

Jan 2025 – Feb 2025

- Developed AI-based image generation workflows using **ComfyUI** and **Stable Diffusion**, creating custom pipelines for text-to-image tasks.
- Gained practical experience in prompt engineering, image enhancement, and visual content generation.
- Built and optimised a data pipeline for image prompt processing and rendering; produced clear technical documentation and reports.

TECHNICAL SKILLS

Languages	JavaScript, C/C++, C#, SQL, PHP, Java, OOPs, .NET (MVC)
Game Dev	Unity (C#), Unreal Engine (Blueprints), PUN / Photon Networking, OpenGL
3D & Animation	Blender (mesh optimisation, asset clean-up), Mixamo (Adobe)
Development	MySQL, MongoDB, HTML, CSS, Android Studio, Data Structures
Tools	Git / GitHub (multi-branch workflow), Postman, ComfyUI, Stable Diffusion

PROJECTS

First Person Shooting Game

Unreal Engine, Blueprints

Developed a first-person shooter using Unreal Engine Blueprints with custom level design built from built-in environment templates. Implemented shooting mechanics where targets are dynamically destroyed. Applied strong analytical and debugging skills to resolve complex simulation logic across gameplay systems.

Kitchen Simulation Game — Burger Builder

Unity, C# (Solo)

Built an interactive cooking simulation featuring burger assembly, ingredient cutting, and cooking mechanics. Used ScriptableObjects, events, and prefabs for a scalable and maintainable architecture. Implemented recipe validation, progress-based cooking logic, and trash disposal; performed extensive debugging to resolve user interaction bugs throughout the gameplay loop.

Chicken and Egg — Catch Game

Unity, C#

Developed a 2D arcade-style catch game where the player controls a chicken that moves left and right to catch falling eggs and avoid stones. Implemented smooth horizontal player movement with boundary clamping and collision detection for two distinct object types — eggs increment the score on catch, while stones trigger an immediate game restart. Designed and integrated **sprite animations** for the chicken character, including idle, walk, and catch states, using Unity's Animator and a frame-based sprite sheet workflow. Spawned falling objects at randomised intervals and positions to increase gameplay challenge progressively.

Foodatary Android Application

Android Studio, Java, XML

Developed a food-ordering app featuring user login/logout, a cart system, and order placement functionality. Implemented real-time networking for live order updates and client-server communication. Incorporated iterative UI/UX improvements based on user feedback to enhance the overall app experience.

EDUCATION

Aug 2023 – Aug 2026	B.E in Computer Engineering at Indira College of Engineering and Management , Pune CGPA: 8.57/10	
Jul 2021 – Aug 2023	Diploma in Computer Engineering at Karmaveer Bhaurao Patil Polytechnic , Satara	85%
Jul 2019 – May 2020	IQRA English Medium School , Satara	86%

SOFT SKILLS

Event Management	Successfully coordinated 3 technical events — designed registration workflows, event tracking, and real-time problem resolution, improving operational efficiency.
Communication	Strong verbal and written communication demonstrated through cross-team project collaboration and technical documentation.
Languages Known	English, Hindi, Marathi

CERTIFICATIONS

- Bootcamp Augmented & Virtual Reality Acceleration
- Deloitte Australia – Cyber Job Simulation
- Google Cloud Big Data and Machine Learning Fundamentals
- Unity Essentials Pathway
